(LISTED BELOW)

SUPPLEMENT TO   25X1X
REPORT NO.

1. Besides the postal service, the Seepolizei, the Generaldirektionschiffahrt (GDS), and the Russian Navy have an interest in the radio station "Rügen-Radio". Though the station was built and is operated by the postal service, requirements and orders are presented to it by the above-named organizations.

2. At present the station is operating only with former Wehrmacht transmitters, of two and eight kw. The RFT which is constructing the new transmitter must contend with ever more technical difficulties. Even the buildings are being finished only slowly as changes are constantly made. The origin of these changes lies in the requirements of the Seepolizei, GDS, and the Central Office for Postal and Long-Distance Matters of the East Zone Postal Service. This mixup has led to the dismissal of the chief building consultant of the Oberpostdirektion (OPD) Schwerin for alleged sabotage. In addition, the planning consultant of the same OPD, Ohldorf, was arrested, also allegedly for sabotage. The Seepolizei is bringing weighty accusations against the radio division of MPF for unnecessarily delaying the project. The chief of transmission of the "Rügen-Radio" after all these events has preferred to flee to the western zones in order to escape imprisonment by the SSD. The real blame lies not with the construction people but with the preparatory offices of the Ministry for Planning, which delayed for months permission to complete the construction of the radio station.*
